INTEGRATING ICT INTO EDUCATION IN UGANDA

Cover page

President Museveni (wearing a hat) commissioning the ICT laboratory at Ntare School as one of the activities to commemorate the Old students' reunion day on 19th April, 2014. Second left is Mr. Bob Lyazi, the Director of RCDF explaining details of the programme to H.E. the President

Programme Description

Status of implementation in the various
Institutions

A. Programme Description

1.1 Introduction

UCC using RCDF in partnership with Ministry of Education and Sports is implementing a programme for ICT integration in Uganda. The programme has made significant impact in the education sector including computer studies being declared compulsory subject in Uganda thus being the only country in Africa with such a policy. Its holistic nature and sustainability has attracted many others to benchmark with Uganda.

The main components of the programme and their respective numbers completed are as shown below;

No.	Project component	Number
1	ICT laboratories	
	i. Government secondary schools	1,027
	ii. Tertiary institutions including all National Teachers' College	43
	iii. Universities	9
	iv. Health training institutions	7
2	Internet connectivity for each laboratory	816
3	ICT teachers retooled for each laboratory	930
4	Virtual science content installed for each laboratory	634
5	Community ICT training using the laboratories (persons)	62,000

Soldiers UPDF at the University of Military Science and Technology (UMST), is a tertiary institution of higher learning, that instructs qualified military officers and technicians in various fields of engineering and science established by UCC

1.4 Criteria for selection of the secondary schools

- Geographical distribution of schools taking into account all the districts of Uganda.
- Schools with the highest enrolment of students

1.5 Key Stakeholders' responsibilities

The key stakeholders for implementation of the programme are;

- Ministry of ICT;
- UCC;
- The Ministry of education and Sports;
- The School;
- Area local leadership;

The typical roles that each of the various stakeholder group plays are as shown in the table below:

MoICT	UCC/RCDF	MoES	School	Local Leadership
<ul style="list-style-type: none"> • ICT Policy and associated guidelines 	<ul style="list-style-type: none"> • Set up ICT facilities • M&E • Commissioning 	<ul style="list-style-type: none"> • Software and applications management • Ownership, Overall control, and supervision 	<ul style="list-style-type: none"> • Secure, good rooms • Furniture • Optimal & responsible usage • Operational budget • Growth and Expansion 	<ul style="list-style-type: none"> • Oversight by; • MPs • Local Administrations • Communities • RDCs • + ALL

1.6 ICT skills' acquisition for community members' project

The project seeks to enable communities around schools with ICT laboratories to acquire ICT skills. The programme is run during school vacations with contributions from the following stakeholders;

- Schools contribute the environment, the ICT laboratory and the teachers
- UCC provides logistical support, meals and technical guidance
- Local leaders such area Members of Parliament provide the required mobilization for the trainees

The main objective of this training programme is to enable the trainees to become people who can:

- Work for ICT facilities
- Operate ICT facilities as and or business venture

Hon. Ronald Kibuule, Minister of State for Youths awarding certificates to community members around Bunya S.S, Mayuge district as the Chief. The Minister was accompanied by Mr. Bob Lyazi, Director – RCDF (in glasses), Hon. Vincent Bagiire (holding the microphone) and school administrators.

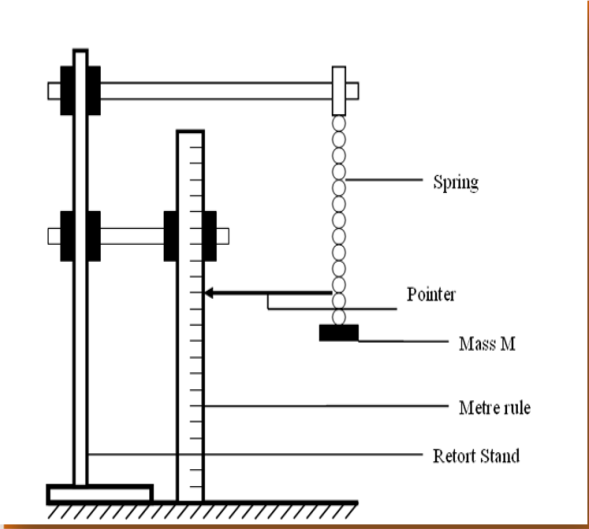

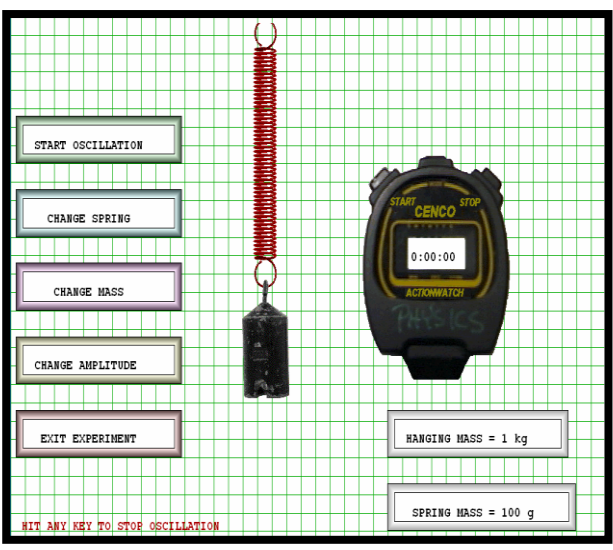

Direct impact

a) A critical number of schools with ICT laboratories 1,027 out of 1,150 which makes it possible to run sector wide programme and to implement education sector wide policies such as compulsory ICT subsidiary at A' level.

b) A basis for the Ministry of Education and Sports to consider and implement more advanced applications of ICT in the teaching and learning activities such as virtual science laboratories.

An example of Physics Practical Virtual Experiment;

Determination of the acceleration due to gravity, g , using a spiral spring

 <p>Spring</p> <p>Pointer</p> <p>Mass M</p> <p>Metre rule</p> <p>Retort Stand</p>	 <p>START OSCILLATION</p> <p>CHANGE SPRING</p> <p>CHANGE MASS</p> <p>CHANGE AMPLITUDE</p> <p>EXIT EXPERIMENT</p> <p>HANGING MASS = 1 kg</p> <p>SPRING MASS = 100 g</p> <p>HIT ANY KEY TO STOP OSCILLATION</p>
<p>Using the traditional laboratory apparatus</p>	<p>Using computer tools – virtual apparatus <i>Source: Learn things Africa</i></p>

- a) A starting point and **proof of concept** for expansion and growth of the ICT laboratories and integrating ICT in other teaching and learning activities
- b) A **virtual networked environment** that allows the sharing of resources and an active and prompt interaction of learners and all other players
- c) A **blue print** of affordable, appropriate and locally tested ICT technologies to be emulated by all who need to integrate ICT into education systems especially the private schools
- d) ICT skills training for local communities around schools under special arrangement

INTEGRATING ICT INTO EDUCATION IN UGANDA

B. Status of implementation in the various Institutions
